

September 19, 2020

Dear Vonos Customer,

Due to the COVID-19 Pandemic and your faith in our product, there has been a tremendous increase in demand of Vonos.

We would like to remind you of transfer requirements from drums and totes. This should be done with only plastic pumps with the transferred material being stored in an opaque containers to guard against UV light and labeled with secondary container labels. Both packages bulk and transferred must be stored according to the label instructions. Please do not mix drum pumps with any other chemicals. This may cause a potential chemical reaction between the different chemistries.

STORAGE AND DISPOSAL - Store in original container in a cool, dry, place away from heat and open flame. Do not allow product to become overheated in storage. Avoid prolonged storage temperatures above 90F. This may cause increased degradation of the product, which will decrease product effectiveness.

If you have any questions please feel free to reach out to us via email at info@vonos.com or via phone at 888-698-6667.

Thank you,
Vonos, LLC
